

# Team Expectations Agreement<sup>1</sup>

When working in a team, problems occasionally arise. One source of problems is the differing expectations of team members. For example, one person may think that an email response should come within 2 hours, while another may think that 2 days is acceptable.

In this tutorial, your team will work on establishing team expectations. In the space below, write down the list of *agreed upon guidelines* that your team intends to follow. Include guidelines for the following:

- methods of communication (email, phone, messenger, text, . . . )
- communication response times (email, phone, messenger, text, . . . )
- meeting attendance (when to meet, whether all meetings are mandatory, . . . )
- running meetings (when, where, face-to-face vs. online, who takes minutes, . . . )
- meeting preparation (whether preparation is needed, what to prepare, . . . )
- version control (what to/not to commit, content of log messages, . . . )
- division of work (how to divide work, who will decide who does what, . . . )
- submitting assignments (when to submit, who will submit, who will review the submission, . . . )
- contingency planning (what if a team member drops out, what if a team member consistently misses meetings, what if a team member is academically dishonest, . . . ) We suggest that in these cases, a team promptly seeks help from the instructor. It is important not to let such situations escalate.

The list above is just meant to get you started. If you had any team problems in the past, think about what went wrong and how expectations can be set to prevent those types of problems.

---

- Communicate by Discord or by phone call in emergency
- Response times should be within 2 hours
- Meeting every weekday at 11am for standup
- Meet on Discord CSCC01 group server
- Prepare questions for standups: what did you do yesterday, what are you going to do today, do you have any roadblocks?
- Commit messages should be concise and meaningful, open pull request instead of pushing onto the master branch
- Divide the tasks evenly to each teammate, pick the one that we are good at
- Everyone makes contribution to the assignment, review submissions together a day before the due dates
- If a teammate constantly missing meetings, we will send a warning message to him. If he still missing the meetings, we will report it to our TA

(Continued on the other side.)
